

Working Student Standortplanung / Site Assessment

YOUR ENERGY FOR THE FUTURE

With electricity from wind and sun, with green hydrogen, with CO₂-free mobility, with smart storage and use, we are building the energy system of the future. This is how GP JOULE ensures the energy supply for generations as a universal provider of renewable energies. Producing all energy consumption in a renewable way is more than a goal for us. It is our responsibility. GP JOULE has been putting this responsibility into practice since 2009.

GP JOULE PROJECTS develops photovoltaic or wind projects from greenfield to operational: we secure the land, coordinate everything with the municipality and the authorities, submit permit applications and ensure the implementation of the plant.

For GP JOULE Projects GmbH & Co.Kg we are looking for the next possible date at our locations in **Reußenköge** or **Flensburg** (home office possible):

Working Student Standortplanung / Site Assessment (20h /Week)

GP JOULE Projects GmbH & Co. KG

What You Will Do
